Foreword

The purpose of this publication is to disseminate as easily and broadly as possible key statistical data on the northernmost region of Québec. *Nunavik in Figures 2020* is a summary socioeconomic portrait of the population and living conditions. Its data is extracted in large part from the Nunivaat databank, a core component of the Nunavik Statistics Program. The Program was created in 2005 at the request of the Kativik Regional Government to document the demographic, social and economic situation in Nunavik, as well as related trends and priority issues.

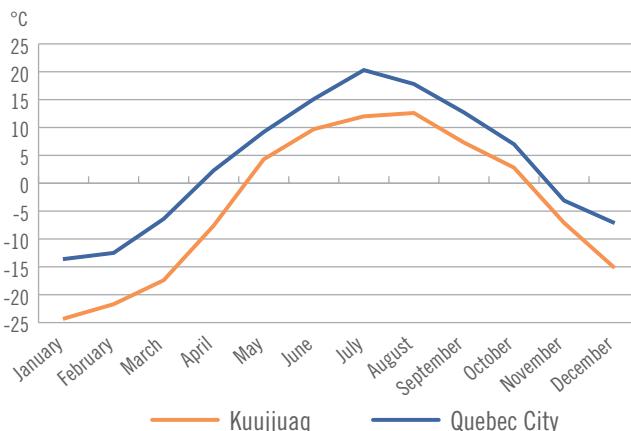

The sources of the data presented in this publication are mainly Statistics Canada, the Institut de la statistique du Québec and a few Nunavik organizations. Some data represents original research performed by Nunivaat. The data appearing in *Nunavik in Figures 2020* was up-to-date at the time of publication. Most of the data is also available in table format on the Nunivaat website. Detailed source information for each table is provided in *Nunavik in Figures 2020 – List of Sources* posted on the Nunivaat website.

Nunavik in Figures 2020 is published in an Inuktitut–English version and an Inuktitut–French version. Printed copies may be obtained from Nunivaat or the Kativik Regional Government. The full versions may also be viewed or downloaded from www.nunivaat.org.
